“GET INVOLVED WITH P.A.R.T.”

Prostate Awareness Research and Treatment foundation is proud to announce to the community our second Free Robotic Prostate Cancer Surgery conducted at Jackson South Hospital on June 30th, 2010. The surgery was performed by Sanjay Razdan, M.D., MCh., the Medical Director of the International Robotic Prostatectomy Institute at Jackson South Hospital in Miami, Florida.

Our organization is committed to helping those patients who cannot afford treatment. We help patients with prostate cancer receive proper care completely FREE of cost. This free service is provided to economically disadvantaged people once a month from the generous donations of P.A.R.T. and the surgical expertise and time of its founder Dr. Razdan.

P.A.R.T. will continue its mission in the community. We believe in treating and providing the BEST support services such as patient mentoring, education, and awareness of prevention and treatment options for the patient and his family members.
